

Panorama Surveys and Engagement

Drive school improvement with vital feedback from your community

Panorama Surveys and Engagement is the leading K-12 platform for **gathering, analyzing, and acting on stakeholder feedback**. From benchmark surveys to pulse checks, districts can measure student, family, and educator experiences to drive strategic decisions that improve school climate, engagement, and student success.

With **research-backed surveys, advanced analytics, and intuitive reporting**, education leaders can uncover key insights, compare results with national benchmarks, and take targeted actions to enhance learning environments and track student success over time.

✓ YOUR TRUSTED K-12 SURVEY PARTNER

Research-Backed Surveys In partnership with Harvard Graduate School of Education	50% of the top 100 largest public school districts in the US	1.5 Billion K-12 survey responses, the largest national dataset of its kind

Gather critical feedback at scale

Run district-wide online and paper surveys with Panorama's research-backed, customizable survey content. Available in 30+ languages, our surveys ensure a wide range of student, family, and educator voices are heard. Panorama provides direct support to set up surveys, boost response rates, and maximize engagement.

Unlock actionable insights faster

Gain clear insights into student and system-wide needs with best-in-class reporting. Easily analyze survey data using peer benchmarking, advanced demographic filters, and more. Inform decision making with AI-powered features that quickly surface trends and concerns in free responses.

Make better decisions for your district and schools

Move seamlessly from survey data to action. Track trends over time and leverage nearly 900 research- and evidence-based strategies to improve school climate, build students' skills, and engage with families.

Ensure data privacy and security

Trust that your district's survey data is secure. Panorama complies with SOC 2, FERPA, PPRA, and COPPA regulations and is a member of the Student Data Privacy Consortium, ensuring secure data collection, analysis, and reporting.

Survey administration

Panorama offers tools to distribute surveys, track responses, and analyze real-time insights. Run anonymous or confidential surveys, customize questions, and add district branding. Select topics and scales from our bank of research-backed questions with accessibility features and opt-in/opt-out tools.

Enhanced Survey Reporting

Take your survey insights to the next level. Compare survey results to national benchmarks, pinpoint strengths and growth areas at the district, school, and classroom levels, and break down data by subgroups to uncover experience gaps—helping you make informed, data-driven decisions for real impact.

National and Peer Benchmarks

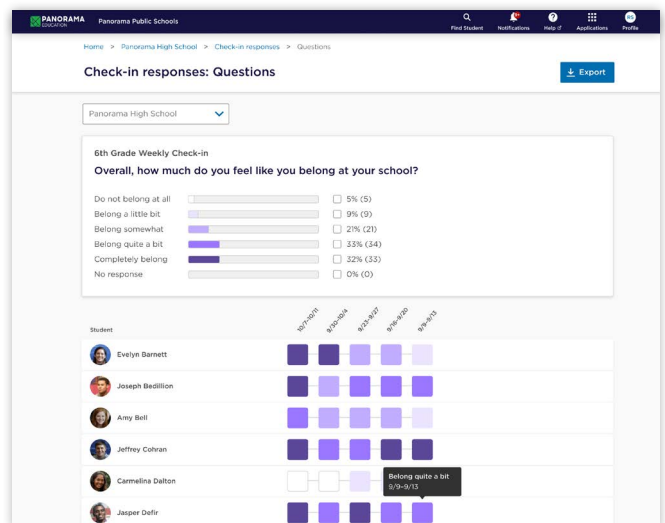

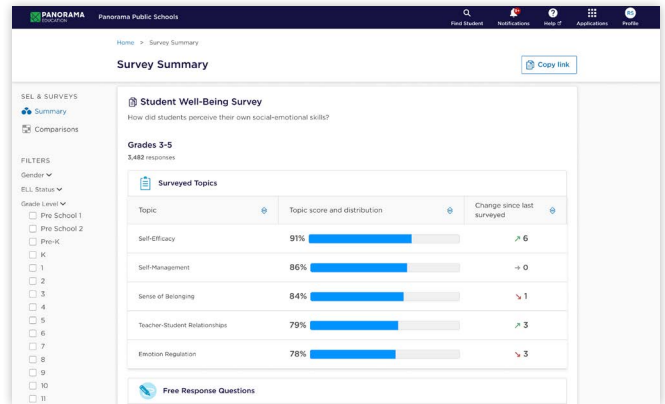

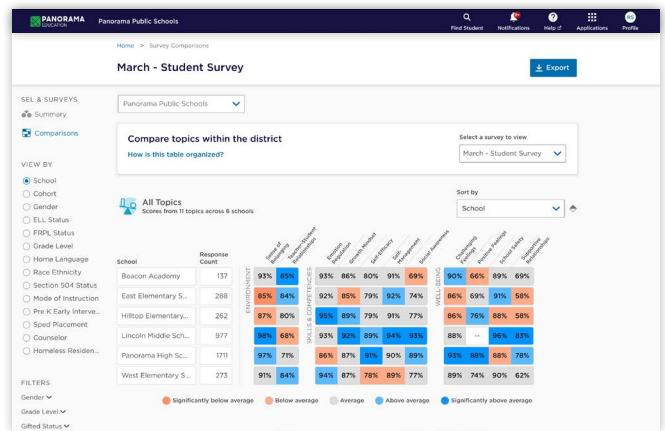

With the largest dataset of 1.5 billion K-12 survey responses, only Panorama can provide national and peer benchmarking to help you interpret your data with confidence. See how your students compare to peers and how your school or district measures up to similar communities.

Panorama Check-Ins

Collect quick perception data to see how students are doing between survey windows, identify where support is needed throughout the year, and deliver timely supports. Check-Ins is available as an add-on.

Panorama Playbook

Panorama Playbook offers nearly 900 research-backed strategies for academics, school climate, and behavior. Integrated with survey reports, it provides targeted recommendations aligned with district goals. Administrators can customize content, ensuring educators access relevant, evidence-based strategies to drive improvement.
